- ☐ Technical Mountaineering/Rock Climbing*
- ☐ Back Country Alpine Skiing*
- ☐ Cross Country Skiing*
- ☐ Mountain Bike Touring
- ☐ Photography Trips
- ☐ Survival Course
- ☐ Llama Packing

☐ Other (please specify) _____

(C) Worded Description Operating Area Being Requested. (If more space is required, use separate sheet)

If the operating area description of each area for which you are applying has not appeared on a previous license one is required below.

For outfitter area on **public lands**, typically a worded description defining the operating area from a point of beginning around the area and back to the point of beginning is required. Information sources most often used to describe operating areas on public land are: USFS or BLM Forest or District boundaries, IDFG unit boundaries, County borders, State border, state and federal highways, county designated roads and federally designated trails. Also, it is possible to use landmarks such as rivers, creeks, ridges, mountain peaks, and watershed divides, etc. **Private lands** are most easily described using county plat references due to the specificity of private land ownership. However, other sources listed above can be used. It is important to note that private land operating areas are typically much smaller in scale than public land operating areas, and are often intermingled with other land ownership. The maps of private lands licensed to an outfitter are needed to give the Board, other agencies, land owner and often other outfitters a clear understanding of where an outfitter would be licensed to operate. The area description **must specify the Fish and Game Unit(s)** in which the operating area is located. Also a **map(s) of the area(s)** described above must accompany this application. See Amendment User Manual for instructions.
